

Multiphase Pump User Roundtable

Petroleum(ETC) is pleased to announce the 10th annual Multiphase Pump User Roundtable (MPUR). This event will be held in Calgary and is scheduled to coincide with the Global Petroleum Show. The goal of this Roundtable is to foster interaction between oil & gas operating companies, manufactures, regulators, and researchers.

The Multiphase Pump User Roundtable is an event developed by Dr. Stuart L. Scott that focuses on the application of multiphase pump technology. In the past nine years, we have seen the MPUR grow to become the premier event for multiphase pumping and a unique forum to learn about this evolving technology.
